Comments: Fracking, logging, and burning destroy precious old forest diversity and the ability to protect climate and pollute air and water.

My COMMENTS ON WAYNE DRAFT ASSESSMENT FOR NEW FOREST plan DUE MONDAY, MARCH 23. I feel we need to respect and protect what little forest we have here in Ohio by only using non motorized trails and certainly no fracking or other extraction methods which will damage forest, wildlife and pollute earth, air and water. I want to be involved in the planning process and have your concerns HEARD and acknowledged and abided.

Also please add my info to the Wayne's e-mail list to receive notice of future Wayne actions and opportunities to be involved.

I thank you to do your job without profit from extraction and only protect our precious forest!
