Title:

Comments: I am in my 80s. Based on my age and health, I'm at highly increased risk of complications and death from the coronavirus. For obvious reasons, the coronavirus outbreak has disrupted my life, as it has for many people my age. In addition, I now have heart problems which have further complicated my life. I am a widow living alone so I have spent a lot of time recently preparing for secluded life during the outbreak and trying to obtain the necessities I will need for this seclusion. I had planned to comment on the Walton Lake project but have so far been unable to do so. Because of the coronavirus pandemic I ask for a new comment period on this project. It's just not fair to expect regular people to be able to comment on this project at the beginning of a major worldwide pandemic. It is just not that simple. Thank you.
