Comments: I support the Mission Ridge Development project. I am not a skier, I do hike the area in the off-season. I also have hunted grouse, deer & elk in the mission ridge, Stemilt Basin for over 20 years.

The #s of big game in this area is not significant. The area between the State Park & the micro-wave towers at the end on Naneum Ridge is used for elk calving in the spring. However, this is after the ski season, and winter users will be gone. A wildlife corridor could be a real asset.

A second access/egress road and fire preventative measures would benefit the entire area south of Wenatchee.

We have been very lucky in that this area has not burned. Especially Forest Ridge & Squilchuck valley.

Mission Ridge has been a wonderful asset to our valley, and expansion and improvements including private homes & condos will give ownership \$\$ for needed upgrades .
