Comments: I oppose the expansion of mission ridge for several reasons. First off is the ingress and egress of this area. This is a high fire and active geological area and only has one way in not only for the public but first responders as well. Secondly the area supports a wide array of wildlife which would be significantly impacted by year round housing and the additional high volume of recreational use during spring, summer and fall. Mission Ridge who originally was going to put conservation easement and restrict areas during these times of the year pulled out that wording in there plans. Last of which why I oppose this expansion is personal, I love my local ski hill. I ski there a lot with my friends and family. I enjoy being able to go there and it not be a huge expansive ski area. If I wanted long lines and crowds I could just as easily go to Stevens Pass. This expansion will only lead to vast amounts of people putting additional impact and trash on our public lands.
