Title:

Comments: Please make the homes, condos and lodging fit the environment. No monstrosities such as McMansions, no tall buildings. For example, think of the three story hotels on Maui. They look like hospitals. Please build some tiny homes. Do not give Mission Ridge to the rich. Build some affordable housing for the staff. The CoVid 19 virus outbreak is proof that we cannot keep living and working the way we have been. Always rushing around to work, driving so many cars, worrying about paying bills, rationed education and healthcare, overworked to the point of illness and exhaustion.

It is so obvious that the way we have been living is unsustainable. When we drive down the mountain and can see Boodry Court, a community directly below and earthen dam, we need to think of the people who live there. When we make money with this project we need to give our neighbors equity. Everyone should have access to skiing and snowboarding. We are not so special. The forests of the US belong to everyone, and everyone should have access to them.
