I am writing this requesting that ten times the land proposed to given to the wild horses. I understand that something has to be done, however, this seems so very little to protect these beautiful horses.

Why can't there be a roundup and have true ranchers come and take some of these horses NOT TO BE SOLD AS DOG FOOD? There are families that would like to adopt these horses, why not that?

The horses feed off the land just like cattle. They do NOT pull up the roots like sheep. To say they are destroying the grazing grass is not so, it's fallacy to get rid of the horses.

Please protect these beautiful creatures.
