Comments: The plan looks to me to be in harmony with wildlife and certainly would benefit the economic viability of Mission Ridge...IT seems to be a pattern where more and more skiers will visit from outside and thus need lodging , food, etc. As good as Mimi is as a begginer run it is inadequate now and will quickly become an obstacle to a family wanting to ski here....The PPlan seems to take this in consideration ...Those long looping trails will serve beggining skiers , families and the elderly better than any runs now at the Ridge. Fire danger could be mitigated it would seem by this development . I have always been impressed with both managment nd staff at the ridge and dont think they would be insensitive to any part of the developmnet that could be shown to adversely impact wildlife. The jobs at the Ridge have traditionally employoed seasonal forest service workers and served their recreatioanl needs as well ...a kind of benefit to seasonal layoffs....So count me as a yes vote for further enhancemt of the Mission Ridge experience.
