Comments: Our state of Washington has had a huge population increase, however the access to outdoor recreation has not had the commensurate increase. The mountain biking community has done a great job to increase trails. Hiking trails have not kept up. The ski industry has not been able to come close to keeping up. I have studied the economic and environmental impacts of the ski industry over the decades. This proposal is an excellent way to increase the supply of recreation without adversely impacting the environment. It is also a great aid to the economic stability of the Wenatchee area. Please approve this plan and do everything possible to expedite it's construction to completion! Thanks!
