Comments:

This project is desirable in my opinion and should be approved for all permits by appropriate Regulatory Agencies. I am confident the Mission Ridge project team is professional, dedicated to do the "right thing" and the project will be subject to best management practices during construction and operation. The land will provide much needed fun and family enjoyment for citizens throughout the state (I live on the west side and ski more at Mission than any other area). I already contribute to the Wenatchee valley economy and many more people will with this expansion. The Mission Ridge management has a local small ski area philosophy which is rare now days, therefore they are highly motivated and directly accountable to the local community and Regulatory Agencies.
