Title:

Comments: While i do support this project because of the economic impact it will bring to the valley, I would like to see restrictions placed on pricing policies Mission Ridge charge for access and services. Because Mission Ridge can financially benefit from a lease of a publicly owned entity (land), foremost responsibility to the give back to the community through cost control measures. This project CANNOT turn out like the sports stadiums in Seattle where event cost and food/service costs are out of the reach of most citizens. There MUST be a cap on prices and price increases as the prevent the community to be gouged by this venture.
