Comments: I learned how to ski at Mission Ridge several years ago as an adult. This expansion would be a valuable addition to the local economy, but also to the overall ambiance and critical function of the ski area. The area used to teach both skiers and snowboarders is in fact quite small. Much smaller than other resorts I have utilized in the last four years since my first experience at Mission Ridge.

In the last four years since my first Mission Ridge experience, I have had the opportunity to ski at Whistler, Breckenridge, and White Pass. Mission Ridge's beginners area is actually quite small compared to these other resorts.

In conclusion, I see this expansion as being a positive outcome that benefits the local economy while creating a richer, more vibrant experience on the slopes and in the outdoor environment.
