Title:

Comments: My family and I frequently hike and camp in the Great Burn area and are in favor of continues or expanded protection of this area for future wildness-type use, including non-motorized use. We are especially concerned about illegal use of snowmobiles and e-bikes. I've encountered e-bikes during hunting season on closed roads along the Fish Creek road, for example. These illegal activities undermine the quality of the backcountry and generally lead to further abuse of our public forest lands.
