Comments: Dear Forest Service,

This news about restoring Gold Creek is the best news I've had in a long time. With everything tragic that is happening around the world and around the country in our human communities, I have been so afraid we would forget how important the connection is between what is happening with Covid-19 and the long term project of restoring and improving resiliency in our landscapes and wildlife populations. You have my enthusiastic support, and a thank you for making my day today. Tamara
