Comments: I am in support of the protection of the great burn wilderness area. Protection of a crucial habitat for many plants and animals in area that should stay undisturbed by humans and human machines, is crucial. Human infrastructure and logging should not be a priority because is not a necessity, the necessity is protecting the resources which includes everything within its boundaries. This area is a natural bridge of wilderness for many animals, specifically grizzly bears, to reach habitat that was once a place for them. It is our job to preserve these areas because without doubt, humans have disturbed a majority of our planet, why choose to disturb more?
