Comments: Hi everyone!

The public scoping comment period is open till 4-30-2020. This is your opportunity to comment on the future of trails in the CDA ranger district, specifically this project. This is the statement that we are recommending people send in as a comment. If you want to modify it in anyway you're welcome to, but it is critical to keep the road #'s and classification the same. If you want to copy and paste this comment you're welcome to. The more similar they are, the more they count towards the same goal. With so much representation towards the single track and less than 50". We are focusing on the >50".

If we can start a >50" trail system it will help direct some of the use legal and illegal away from the other trails.

"Trail #2337 and trail #2339 are designated high clearance Jeep trails or 4wd trails. They do not represent a class 2 trail defined by the USFS. My request is that the USFS should work with the local offroad groups to develop these trails into Class 2 trails with obstacles to create an excellent >50" offroad opportunity for the public to recreate on in our local forest. Though this is a beginning, the need for a larger >50" trail system has a significant need to disperse the use to mitigate possible damage from overuse."
