Comments: Hi, I just wanted to comment on the Forest revision plan #44089. I choose alternate X. Having lived in Idaho for over 40 years I have seen many changes in the forests. I get the idea of having some wilderness and rules to follow when within the forest boundaries. What concerns me is the constant need to turn more forest into wilderness which limits recreational activities for a majority of the population that don't have the money to fly in, go in guide/outfitter trips etc. Towns around the forest all benefit from the visitors from purchasing fuel, food, lodging & supplies. I choose to recreate on an ATV and I stay on trails or roads I know others don't always and they should be dealt with in a manner that is appropriate. I probably access the forest around the state of Idaho 30-50 times a year going camping, hiking and riding ATVs. I spend money in the towns around the forest when I do these things if the access I have had changes then it's quite possible I won't be going anymore.

Thanks

Michael
