Title:

Comments: 1: I am against this. All creeks are getting dryer, blame global warming, not these ponds.

2: You are destroying a much liked easy destination for a small nature walk. And for what? Potentially some fish that my not come back anyway? Sounds job security to me... and perhaps giving work to some related contractors.

3: We have \$22 trillion in debt. After the corona virus is over, we will have \$30 trillion in debt. Suggest to reduce workforce, concentrate on essential work.
