Comments: Dear U.S. Forest Service Representatives,

In the Nez Perce-Clearwater NFs Forest Plan Revision I would like you to consider the following:

Please establish alternative plans for public comment that include for Wild & Scenic river designations the South Fork and Kelly Creek; enact strong provisions for sustaining and increasing native fish populations; decrease winter motorized activities across the board to benefit sensitive species like mountain goats and wolverines, increase habitat security, restoration, and connectivity for mountain goats and wolverines; maintain recommend wilderness areas and advance them for capital "W" Wilderness designation; and, do not allow motorized use or road building in recommended wilderness.

Thank you sincerely,

Hannah
