Comments: I would like to register my comment supporting the NO ACTION option with the following changes: Hoodoo area will be designated as 'semi-primitive motorized' instead of a RWA.

I do not currently support the creation/listing of more RWAs until we have a better way to de-classify/de-list an RWA after the formal USFS Study is done. If the USFS can via the stroke of a pen create an RWA, then it should be able to de-list an RWA without the approval of congress (which is what it takes now). It's all too easy to create these areas, but then never get them back if it's found to NOT be wilderness. So until there's a better way, I will not support the use of RWAs.

Thank you for your consideration.
