Comments: I support healthy logging and management of all of Idaho forests. I also believe management should be turned over to the state. I have witnessed for too many years the mismanagement or complete lack of any management from the USFS on Idaho's national forests. The only thing the USFS does to manage the Federal Forests is to lock the public out and let our forests die from disease, bug kill, and wildfire. I fully support healthy logging to manage Idaho's forests. It benefits the forest, the wildlife, the economy, local schools, and the community & country as a whole.
