Comments: Thanks everyone for taking the time to investigate Gold creek valley, it certainly is a special place. Sure the creek dewateres and the channel wanders all over the valley, But it always has. The cobble that makes up the valley is 200 ft deeply according to old wsdot data. I've been going into the Gold creek watershed since 1986. And have been a property owner since 2005. Restoring Gold creek pond will not affect the dewatering of the creek. The waters that fill the pond are a different source than the water that fills the pond. Being a member of STVMA, I'm all for the good of the valley, and the proposed projects do not seem to be in the best interest of Gold creek valley, to bundle the project with K to K, is Really a crappy. Idea
