Comments:

If we can start a >50" trail system it will help direct some of the use legal and illegal away from the other trails.

Trail #2337 and trail #2339 are designated high clearance Jeep trails or 4wd trails. They do not represent a class 2 trail defined by the USFS. My request is that the USFS should work with the local offroad groups to develop these trails into Class 2 trails with obstacles to create an excellent >50" offroad opportunity for the public to recreate on in our local forest. Though this is a beginning, the need for a larger >50" trail system has a significant need to disperse the use to mitigate possible damage from overuse.

Opening these trails will help many families get out into our public lands and keep younger generations interested in outdoor conservation.
