Title:

Comments: I am very concerned about how you are proposing to treat our public land with this long-awaited forest plan. Please do not remove ANY protections for the streams that are Wild and Scenic Rivers contenders. They should be forever protected. They are the lifeblood of our forests and our earth. Please stop building roads through our few remaining roadless areas. Please stop logging these places as well. We have so little left - please leave it be.

Respectfully submitted,

Kristin Frish
