Title:

Comments: I live in Idaho. My husband and I raised our children where we spent most weekends in the outdoors, fishing, white water rafting and on snowmobiles, motorcycles, and ATV's. We love the mountains and the forests. There is something for every season to be enjoyed in the forest and mountains.

We mostly ride in Franklin and Bear Lake Counties because we can get to the mountains right from our front door or trailer a quick 20 minutes away. We have ridden in other areas of the state (Madison, Fremont and Valley Counties) with family and friends on special occasions. However we feel no reason to trailer on a regular basis when things are so good right in our own back yard. With this in mind I want everyone out there who enjoys what we do to be able to recreate in their own and/or nearby counties.

Being in the forests/mountains provides an opportunity for so many different emotions and experiences that can not be felt or had any other way or place. There is room for non-motorized and motorized recreation in these areas. There is no reason to be prejudiced against one form of recreation over another. The land should be accessible to all in all forms. There is already enough wilderness in this forest.

I strongly support Alternative X as described in the DEIS for the Nez Perce-Clearwater National Forest.

I appreciate your time to see the good in this action.
