Title:

Comments: I support the no action alternative and I also support changing the RWA status on the Hoodoo area to a semi-primitive motorized area. Which would allow snowmobile and snowbikes access in the winter time and Mountain bikes in the summer. North fork spruce-white sands and sneakfoot meadow should be eliminated too. I don't support anymore RWA'S or any new Wilderness we have enough. I haven't had a chance yet to ride this area but I am hoping to in the future. The Mountain Goats migrate out of the high elevation in the winter time down to lower ground where there's not much snow. This area needs to be left open for snowmobile use.
