Title:

Comments: From what I understand, the plan is to change trail #1,3,5 to non-motorized, but you see those are a few of the harder single dirtbike trails we have in the trail system currently & dirtbikers like the challenge. It is a lot of rocky & difficult terrain thats not even ideal for hiking. Wouldnt it be easier to build new nicer hiking trails?

Secondly, its my understanding there will be made many areas of motorized use that is for 50" wide UTV use, which is great! However, I hope your not planning on taking nice dirtbike single track trails & converting them to 50" vehicle trails because that would essentially make the dirtbike trails all beginner road like trails. There are plenty of areas with roads all over to open & make UTV accessible. Preserve the single track & keep as is for dirtbikes please.

Canfield began with mostly single track trails & has been maintained & cleared throughout the years by dirtbikers & members of PANTRA. Keep our single track . Why should dirtbike have to relocate when we put the work into our trails that been there for years?

Thank you!
