Comments: I support multiple use and active use of National forests in Idaho

We must manage our forests, to allow timber harvest, hunting/fishing, recreation

With increased wild fires, we must cut old growth and continually plant and manage new growth, with common sense.

I strongly oppose any further designation of any our forest to wilderness designation.

We must utilize our natural resources with common sense and wise decisions for the people of Idaho and the country.

I strongly oppose any further designations of Wild River/Scenic areas. We have a large portion of Idaho already designated. Please do not capture more. God gave us these resources to use. NOT hoard.

I support the principal to utilize what forests we have left -multiple use to include logging, mining, livestock grazing, and recreation.

Thank you
