Last name: Nuxoll

Organization:

Title:

Comments: I am Sheryl Nuxoll from Idaho County where we farm and ranch with my family. Our family understands the concept of multiple-use management when we farm, ranch, hay and log on our own property for conservation and efficiency.

In the last decade, because of the wildfires, one can hardly breathe while working outside. But I expect the same conservation and efficiency from resource management by the federal agencies.

I support active multiple-use management of our national forests, including such activities as grazing and logging. Our national forests when properly managed and used provide tremendous benefit to citizens of our state and nation.

I support parts of the Forest Service's alternatives as presented in the Draft EIS for the Nez Perce-Clearwater NF, Forest Plan Revision. I specifically support the proposals of increased timber harvest, sustained livestock grazing options, with no additional designations of any type.

I ask the Forest Service to revise the forest management plan to fully embrace the principle of multiple-use and reject further proposals of Wilderness or Wild & Scenic River designations.
