Comments: I oppose grazing of livestock on public lands. It is unsanitary and disgusting and erodes stream beds in areas that humans would like to recreate. I admit to not being fully informed on all issues you may be discussing, but please know that living in Bannock County, Idaho and trying to use many of our public lands for hiking, camping, and ATV riding often feels like I'm trying to play in a cow latrine. Stream beds are mud pits and vegetation is trampled down. Any change to policy to separate livestock (especially if it is private livestock) from public lands that could be beautiful if not for disgusting cow feces would be greatly appreciated. Thank-you for considering.
