Title:

Comments: Thank you for the opportunity to provide comments. I am Stanley Searle from Bingham County where I farm with my family. I write today expressing my support of parts of the Forest Service's alternatives as presented in the Draft EIS for the Nez Perce-Clearwater NF, Forest Plan Revision. I may not have this area in our back door. But the rules put in place will effect the way federal lands are managed in the whole state of Idaho. We need to manage our resources so that the areas natural resources our being used not wasted. The need of increased timber harvest, sustained livestock grazing options, Help both nature and Man without waste. This world has the ability to maintain its self if you do not get in its way. I support no additional designations of any type.

As a farmer, I understand the need to actively manage my lands and resources. With the increased risk of wildfires that we have seen in recent years, I expect the same attention to resource management of the federal agencies. I see federal dollars wasted both from fighting the fires and unused resources that could have been used to help local economy's

I support the active management of our national forests, including such activities as grazing and logging. I ask the Forest Service to revise the forest management plan to fully embrace the principle of multiple-use and reject further proposals of Wilderness or Wild & Scenic River designations.
