Title:

Comments: As a 37 year resident of Eastern, WA, parent of 2 eagle scouts & wife of a current scout leader, I beg you not to increase the board feet coming out of these forests! They have had many wonderful times learning about & learning about our precious resources. I now have 4 grandchildren & 1 on the way.

With the current administration removing or decreasing protections on the environment, plants, & the wild animals, please do not increase the 'raping & pillaging' of our unique habitats! Please DO NOT ruin this land for the Native Americans & all people of today as well as future people!
