Comments: The closing of more land access to people trying to enjoy the great outdoors and what Mother Nature has to offer EVERYONE is ridiculous. All I see anymore while exploring the forests are closed gates and more government owned closed land that is PAID for by the people. I'm sick and tired of hearing and seeing the government overreach into the forests. Why don't you guys focus on mitigating the fires that torch our beautiful forests every summer instead of osv vehicles that endanger nothing more than your feelings. Get over yourselves and try to understand that you do not own the people of the United States rights. They can enjoy the land just like you can and you and making it impossible to get away from the cities. Nobody except for employees that work in your brand new office in orofino care about your closures of more land. The USFS is a joke as far as I'm concerned and it's all because you can't keep your greedy hand from stealing our land just to close it off and let it burn because you refuse to log and graze the forests. Instead of buying brand new DNR fire trucks and employees making too much money driving around in your brand new trucks, you could put that money towards preventing fires... proactive vs reactive management. All you do is react to a fire and send dnr resources from state to state. It's a joke.
