Comments: Over 10 years ago I saw the problems Wild Horses were making to Murderers Creek unit. Damage to watershed and fragile ecosystems. It looked as if motorcycles had run tracks throughout the country I was totally disgusted. I did a trip to the Steens not long after and noticed large piles of manure all over in this country. That was ten years ago. I now see wild horses everywhere I like to venture. I spend about 80. days in the field. I hunt,fish ,forage,hike,and explore. My lands are being destroyed by these animals. Are they beautiful and intriguing? yes Are they dangerous to our ecosystems? yes Is Oregon out of balance and in need of a plan to deal with this? yes
I ask that you do the right thing and do something about this problem immediately!
