Comments: I have seen the positive economic impact snowmobilers have in the small community of McCall, ID. I think it is important to allow access to all our forest areas by everyone.... motorized and non motorized. My family enjoys all snow sports including snowmobiling. We also enjoy exploring in the summer with our UTV.

The Great Burn area is unique and should be enjoyed by the many not the few.

I support good forest management that allows access.

Special interest groups should not be the voice for all of us.

This is a time when we feel many of our rights have been taken away. It is more important than ever that Forest areas remain open and accessible.
