Comments: Nez Perce & Clearwater National Forest - environment impact statement public comment

Dear Forest Service,

I am concerned about the proposed increase in logging in the Nez Perce & Clearwater National Forests and the elimination of maintenance old growth and of stream fishery habitat standards. I would like to see all roadless wildlands be off limits to road building and logging. These lands should be maintained and preserved in a way to best preserve wildlife habitat for future generations. I want my granddaughters and generations to come to be able to see enjoy these lands as they were, to the extent possible.

Sincerely,

Sandra M McCurdy
