Comments: Plan revision team,

I have explored many of the areas surrounding Nez Perce Clearwater NF but only spent a little time within it. I hope to visit soon. I have seen very few comments on this plan addressing mountain biking. While I am not familiar with exact locations within your forest, there is a huge amount of land being decided on. Mountain bikers value our wild, backcountry areas but also want to access with our human powered bikes. These lands are often currently part of, or eligible for Recommended Wilderness. Whether by allowing mechanized transport or by drawing boundaries carefully, please maintain access to some backcountry riding in these areas. An ideal backcountry ride accesses a view and is not extremely steep, although we are willing to push if necessary! Across the state, most of the ridgeline trails like this that we value so much have been closed to us by land management and travel management.

Thanks for your consideration.
