Title:

Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

I care about all protected areas, the only reason any of it is around today is it was protected

no but I have enjoyed other places with the same type of protections. if I wanted to hear motorized vehicles I would stay in the city.

I'm tired of man and his greed there is no reason to touch this land. we are like a virus devouring everything in our path. for once lets put greed to the side and show that man can do somethings to improve something or at least leave it alone. People have died and fought hard to protect all these areas. there was a reason that they did it was the same then as now greed for the resources they couldn't have.

once a vehicle goes through somewhere it always leaves a mark there are already enough places open to vehicles stop destroying the little natural beauty we have left. ever look at a hillside where vehicles were allowed its natural state was destroyed.

the same as i stated earlier they all should. If we dont protect them they won't be there in the future once you make a hole in the fence the fox can get in. This means that if you start to down grade any protection the laws will slowly be eroded away till there is no protection

same as the other responses

I thank anyone who fights to keep our protected places safe. don't give in to outside pressure stay strong, they win only if we give up or in
