First name: Arushi
Last name: Brinks
Organization:
Title:
Comments: Please save and protect these beautiful and majestic wild mustangs. They are icons of America and represent everything noble.
They DO NOT pose a threat to public or wild land. They have inhabited no differently than any other wild animal. Leave them be.
The cattle ranchers and mining and earth disrupting excavators are the ones doing all the unnecessary damage. If you want to do something productive, then go after them.
