Comments: I am writing this letter in support of the Great Burn Wilderness, for I have a great appreciation for this wonderful area. I have spent numerous times hiking and camping "The Burn" with my wife, children and friends. Additionally I have winter camped and skied there with friends. The solitude that one gets from such a special area is beyond words. That is true of the warm summers, the chilly but colorful autumns and the cold and majestic white winters. The Great Burn should remain a place where people can hike, fish and camp in peace. It should not be a place of development, ATV's, or snowmobiles. All of that will destroy the true value of the Great Burn. There are many places for man's machines and development. Please leave this a place where one can have a wonderful hike and at the same time have quiet and solitude.

Thank you for considering this letter.
