Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

I have hiked the Great Burn (Hoodoo Roadless Area) for at least 25 years. It is a place of great beauty, has excellent fishing, camping and is a good place for hiking with solitude. This area should be recommended for wilderness protection and no motorized access allowed. There are thousands of acres around that are available for motorized recreation. This area is not needed to be released for motorized use! Please protect it for the future.

My family when our kids were little used this area along the State Line trail to backpack into the lakes along the boarder. These were of the distance that we could lake hop and our kids could handle the distances. As they grew older we were able to return and they shared their memories.

I would like the entire roadless area recommended for wilderness designation. Management should not be a cause for any of the area to be removed from this designation due to allowing motorized use.

Allowing the use of snowmobiles would be an excuse for not giving this area the possibility of wilderness designation. This should not be allowed to happen and enforcement of non-motorized use should happen.

Kelly Creek should be listed as Wild and Scenic due to it's importance for trout spawning.

Other roadless areas along the State Line should also be protected from any road construction.

Thank you for receiving my comments to the revised forest plan.
