Title:

Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

I care about preserving all quiet and roadless areas. I have seen the destruction caused by roads and OFF ROAD use. Most of The people having access these areas with off-road vehicles, are capable of walking themselves. They are not disabled individuals out to look at nature. I have watched them do wheelies through pristine Meadows Meadows and repeatedly go up and down steep areas causing deep grooves and erosions.

Quiet and peaceful. No manmade sounds. Exceptional beauty and peace. The ability to be in real nature, where nature and animals have control.

We need huge tracts of land left to its self. Human impact is invasive. wildlife corridors are needed for survival of many species. We humans have already taken up too much land. We tend to destroy what we are in and around- especially with motors, speed, and traction.

Noise, smell, speed. If a motorized vehicle is made with max speed of 5 mph, no noise, no odor-I think it would not sell. These vehicles are made for rowdy play time. Keep the area quiet and pristine animals have a difficult time in winter. We should not add stress.

Wild waters that are free of human toxins. So important, especially since we are backing away from tighter clean air/water restrictions!
