The Idaho State Historic Preservation Office appreciates the opportunity to view the public scoping materials related to the Dead Laundry Project. It is our position that this project is an undertaking with the potential to affect historic properties and that this scoping does not yet fulfill the Forest Service's responsibilities under the National Historic Preservation Act (NHPA).

We look forward to continued communication as this undertaking develops and consultation under 36 CFR 800. However, we feel that the plans on page 13 for Archaeology are appropriate and consistent with the Forest Plan/Site Identification Strategy.

Best,

Lindsay
