Title:

Comments: I enjoy exploring the Nez Perce-Clearwater National Forest each year and would like to see continued access for bicycles because that's my primary method. I specifically would like to keep access to the State Line Trail (Trail 738) and restore access to miles 20-27. Please maintain access to the State Line Trail by the existing singletrack routes.

I do not want to see the environmental damage inflicted through resource extraction on this landscape.

Thanks for your consideration.
