Title:

Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

Wilderness areas provide a safe escape from the coronavirus and other such diseases which restrict our contact with people. Walking in nature gives us a hopeful perspective of the gift of life.

Hiking was a must for me but at 91, I simply recognize the basic need for wilderness areas for everyone but the noise of machines detracts from nature.

Please realize that machines destroy the calming natural sounds for the entire area so please keep them OUT.

Even winter travel destroys the natural life of plants and animals thus the need to be blocked from damage even in winter.

Rivers and streams need to be protected because plants and animals must have water.

All life must be protected and only the National Forest has the legal right to be that life saver.

Thank you for the important task of planning which requires expertise as well as writing skills.
