Title:

Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

I am a retired airline Captain who does a fair amount of pack trips and fishing in Montana wilderness areas. The Big Burn is the type area that is more and more important as the number of Americans seeking the solace of wilderness and other outdoors visits steadily grows.

A friend and I had a 10 day pack trip through this area, and it was an unforgettable experience.

The entire area of 151,874 acres should remain as Recommended Wilderness. The wilderness becomes more and more important as our population and need for peace and quiet grows.

Nothing completely ruins the wilderness experience than engine noise!

Cayuse Creek, Kelly Creek and all their forks are vital parts of this whole.

none

We admire the Forest Service and their hard working and dedicated employees and thank them for the opportunity to take part in the decision making process.
