Comments: Thank you for extending this opportunity for public comment. I'm advocating that the revised plan include bicycle access to the State Line Trail #738 and further, restoring access to the recently closed segment from miles 20-27. Bicycling on this trail is a historic use that can be done safely and complimentary to other trail users. Recreation resources such as the State Line Trail are a draw to mountain bikers and many cases support the conclusion to the positive economic impacts brought to adjacent communities. Last, I ask that the plan recognize the Idaho and Federal Roadless Rules to the benefit of wildlife and ecosystem services.
