Title:

Comments:

Please recommend as wilderness and/or protect all 1.5-million acres of roadless areas, including the Gospel-Hump Additions, in the new forest plan. Weitas Creek is perhaps the most crucial roadless area. Close the 555 route from beyond the Guard Station bridge

?Please make water quality, wildlife habitat and fish habitat standards be quantitative, enforceable, and non-discretionary, without loopholes. Protect habitat for grizzlies so they can recover in the Clearwater.

Natural processes have a better record than does the agency in creating diverse forests. Desired future conditions should emphasize process, rather than end-point oriented conditions.
