Title:

Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

Please give the maximum protection possible for the Hoodoo Roadless Area. Now, more than ever, we need wild places to remain wild in order to protect the many species that live there. Climate change is already putting pressure on these areas, and we don't need to make it worse by adding motorized damage. Keep it wild.

I have not visited this area yet, but am looking forward to some social distancing there this summer.

I would like to see the entire 151,874 acre Hoodoo Roadless Area continue to be managed as Recommended Wilderness.

The Hoodoo Roadless Area should remain non-motorized to protect the plants and animals there. Look at the science, which proves the negative effects that motorized vehicles have on most species.

I recommend recognizing Cayuse Creek and Kelly Creek with all of its forks, as Wild and Scenic.

Thank you for doing the right thing, and protecting this area to the fullest extent possible!

I appreciate all the hard work you have put into creating this forest plan. I am grateful for people like you, who remain true to science and protecting these lands.
