Comments: I have recently reviewed the released Nez Perce-Clearwater Forest Plan Revision Draft Environmental Impact Statement and Draft Revised Forest Plan. None of the alternatives presented reflect the management I would like to see implemented for the Hoodoo Roadless Area. Please accept these comments into the formal record.

Native wildlife in their habitat is very important to me. The goats in the Hoodoo Roadless area would be negatively impacted by roads being built and snowmobilers disrupting their habitat and home.

I have enjoyed observing wild goats there. It is a thrilling experience that I want future generations to have.

I want the entire 151,874-acre Hoodoo Roadless Area to continue to be managed as Recommended Wilderness.

As I stated above, the roadless area should continue that way for the sake of wildlife and also to maintain quiet areas for people.

Cause Creek and Kelly Creek should be protected as Wild and Scenic Rivers. Once they are degraded, it is never the same

I believe that America's still wild places should be preserved and protected. There are many places available for snowmobilers, and there are many roads. Let's protect this awesome landscape.

Thank you for all of your efforts to evaluate the land for all of its qualities, and for accepting and considering comments.
