Comments: To all whom it concerns,

I'm writing to you to voice my concerns with the DEIS the Forest Service is proposing for the Great Burn area.

Personally, I love the Great Burn for SCENERY, CHALLENGE, AND SOLITUDE during the winter season. It is an area like no other in the lower 48 States. There are no other users in the high country in the winter season. There is no wildlife disturbance in the winter due to snow depth. When the snow melts, all trace of snowmobiling is erased. I don't support a RWA designation, but do support protection of the Great Burn from any activities that could impair the character of the area.

Please support the "NO ACTION ALTERNATIVE" with the following changes: Hoodoo area will be designated as 'semi-primitive motorized' instead of a RWA. Access should be limited to snowmobiles, snow bikes and Mtn bikes. North Fork Spruce-White Sands and Sneakfoot Meadows RWA's should be eliminated.

The reason for eliminating the North Fork Spruce-White Sands and Sneakfoot RWA's is they do not meet the Forest Service criteria for potential inclusion into the Wilderness preservation system. They are areas that had been historically accessed by snowmobilers for many years.

Thank you for your time and consideration.

Best regards,

Ryan B.
